

Giving Students the Tools They Need to Succeed

Explore Scientific Papers with **Science in the Classroom** AAAS

How are coral reefs responding to climate change?

Go to "Take the Heat" at www.scienceintheclassroom.org.

→ **Instructors:** Questions can be assigned in Mastering Biology.

NEW! Science in the Classroom presents annotated journal articles from the **American Association for the Advancement of Science (AAAS)** and makes reading and understanding primary literature easier for students. The articles include assessments in Mastering Biology, allowing instructors to assign the journal articles.

NEW! Active Reading Guides support students in actively reading their biology text. Students can download the worksheets from the Study Area in Mastering Biology.

35. On these diagrams of plant and animal cells, label each organelle and give a brief statement of its function.

Concept 6.6 The cytoskeleton is a network of fibers that organizes structures and activities in the cell

36. What is the cytoskeleton?
37. What are the three roles of the cytoskeleton?
38. There are three main types of fibers that make up the cytoskeleton. Name them.
39. *Microtubules* are hollow rods made of a globular protein called tubulin. Each tubulin protein is a dimer made of two subunits. These are easily assembled and disassembled. What are four functions of microtubules?
